COUNTERTOPS

Relevance beyond time

Malborg is one of the leading European manufacturers of hardwood flooring. Malborg products are floor coverings, window sills, countertops of the highest class, which are 100% made of natural wood, the quality and selection of which meet the highest level of requirements. All products combine aesthetic qualities, exclusive design and finishing options, ease of installation and environmental friendliness of the materials used.

The company's production facilities are located in Poland.

Raw materials for the production of Malborg products come mainly from forests approved by the European Forest Certification Program (PEFC), and meet the requirements of the M1 standard - the highest class of building materials. All products are tested for compliance with strict quality criteria.

Malborg is the aesthetic beauty and energy of nature

patented system of locking
connection of boards
«click»

Malborg engineered board is a modern floor covering made entirely of natural wood, its appearance and feel do not differ from the texture of solid board. Thanks to the basis from multilayered birch plywood, the engineering board keeps the sizes in the wide range of fluctuations of humidity of environment.

Distinctive features of Malborg products:

- ✓ Unique combination of reasonable price and high quality
- ✓ Reliable glue-free connection with the locking system «click»
- ✓ Thickness of upper decorative layer of wood (veneer) - 3 mm - at the engineering board
- ✓ Base layer of birch plywood
- ✓ Patented oil-wax coating from 3 to 5 layers
- ✓ High-precision geometry of plank slats
- ✓ Multilayer design that eliminates significant changes in the shape of the slats with changes in temperature and humidity
- ✓ Conformity to the strictest ecological standards and requirements
- ✓ True European Quality
- ✓ 15-year warranty, subject to storage, operation and care

MALBORG is the highest quality in all respects

New building or reconstruction - window sills must always meet high physical requirements. MALBORG window sills are made by patented technology in the form of glued wooden slats and birch plywood under high pressure. Resistant to deformation, durable and environmentally friendly.

Fantasy and style

In interior design to choose the suitable window sill is matter of aesthetics. If you are looking for the unobtrusive element of the room or pronounced accent, MALBORG offers a wide range of decors and sizes. In modern design, window sills with the classic edge and rectangular leading edge are used.

Quality based on experience

MALBORG window sills are made of PEFC-certified wood. Thanks to the careful selection of raw materials and advanced production process, we have high quality products.

MALBORG - Creates Harmony

Wooden dining tables have their roots in the Middle Ages. Since then, they have become firmly entrenched in our homes and our hearts. Made of solid wood, MALBORG countertops are guaranteed to be the center of your kitchen and home for many years to come.

Our countertops bring comfort to your home and allow you to express the individuality of your space.

The popularity of eco-style and the tendency to widespread use of natural materials in the interior has made wooden countertops the most common solution.

Pros of wooden countertops:

- ✓ **Environmental friendliness.** Unconditional plus of wooden countertops - their environmental friendliness and safety (both for humans in daily use and for nature during disposal). The microclimate of the apartment only wins when choosing a wooden surface
- ✓ **Appearance.** Important point is the spectacular appearance of natural material. The texture of wood will ennoble any interior, this material is one of those that give the atmosphere weight, solidity, and is associated with abundance.
- ✓ **Tactile properties.** Wood is not only a stylish appearance, but also outstanding tactile properties: such a surface is warm and pleasant to the touch.
- ✓ **At the top of the wave.** You don't have to worry that tomorrow wooden countertops will go out of fashion: they will always be appropriate, without being tied to interior fashion.
- ✓ **Stylistic neutrality.** Natural wood can fit into almost any style and successfully complement any color scheme. And if suddenly tomorrow you decide to update the interior of the kitchen, giving it a completely new sound, rest assured: a wooden countertop is always in vogue.
- ✓ **Durability with proper care.** With proper care, natural wood surfaces can please you for many years: this material is quite durable.

MALBORG - Outright Naturalness

Wooden shelves are a profitable and successful solution for organizing the space used for storage and placement of various things. Ergonomic and compact designs can become real “highlight”. They are suitable for use in any room of the house.

Wooden models harmoniously fit into any interior, can favorably supplement decoration in the classic and variety of contemporary styles, including the popular now loft.

Natural shades will help to create a complete feeling of being in the fresh air and open space.

Advantages of wooden shelves:

- ✓ strength
- ✓ reliability
- ✓ elegance and presentability
- ✓ endurance to loadings
